

NAME

logname, logdir, logtty, logpost – login information

SYNOPSIS

```
char    *logname(), *logdir(), *logtty();
logpost(buf)
char    *buf;
```

DESCRIPTION

Logname returns a pointer to the null-terminated login name (fits in 8 characters).

Logdir returns a pointer to the null-terminated login directory pathname (fits in 22 char).

Logtty returns a pointer to the tty letter.

These data are created by *login(I)* using the function *logpost* which is executable only by the super-user.

This function is kept in the **-IPW** library.

SEE ALSO

login(I), udata(II)

DIAGNOSTICS

Same as for *udata(II)*.
