

NAME

group – group file

DESCRIPTION

Group contains for each group the following information:

- group name
- encrypted password
- numerical group ID
- a comma separated list of all users allowed in the group

This is an ASCII file. The fields are separated by colons; each group is separated from the next by a new-line. If the password field is null, no password is demanded.

This file resides in directory **/etc**. Because of the encrypted passwords, it can and does have general read permission and can be used, for example, to map numerical group ID's to names.

FILES

/etc/group
