NAME
     logname, logdir, logtty – information from login

SYNOPSIS
     logname
     logdir
     logtty

DESCRIPTION
     Logname prints the user's login name.

     Logdir prints the login directory pathname.

     Logtty prints the single character tty letter (and never prints 'x').

     These data are created by *login*(I).
