NAME

    dsw − delete interactively

SYNOPSIS

    dsw [directory]

DESCRIPTION

    For each file in the given directory ('**.**' if not specified) *dsw* types its name. If **y** is typed, the file is deleted; if
    x, *dsw* exits; if new-line, the file is not deleted; if anything else, *dsw* asks again.

SEE ALSO

    rm(I)

BUGS

    The name *dsw* is a carryover from the ancient past. Its etymology is amusing.
