**NAME**

dn − DN-11 ACU interface

**DESCRIPTION**

The *dn?* files are write-only.  The permissible codes are:

    0-9  dial 0-9
    :    dial *
    ;    dial #
    −    3 second delay for second dial tone
    =    end-of-number

The entire telephone number must be presented in a single *write* system call.

It is recommended that an end-of-number code be given even though not all ACU's actually require it.

**FILES**

/dev/dn?
